PROFESSIONAL SUMMARY

Entry-level Data Analyst and Computer Science Engineering student with practical training in Python and Data Analytics and hands-on project experience using SQL, MySQL, Excel, and Power BI. Skilled in data cleaning, data validation, exploratory data analysis (EDA), SQL-based data extraction, KPI reporting, dashboard development, and identifying data inconsistencies. Detail-oriented with experience maintaining accurate records and preparing analytical reports. Seeking to contribute to data quality, reliable data operations, and data-driven decision-making.

TECHNICAL SKILLS

SQL & Databases: SQL, MySQL, Relational Database Fundamentals, Joins, Subqueries, Filtering, Grouping, Aggregations, Data Extraction
Data Quality & Analytics: Data Cleaning, Data Validation, Data Accuracy, Data Completeness, Data Consistency, Discrepancy Identification, Exploratory Data Analysis (EDA), KPI Reporting
Python & Libraries: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Pathlib
Reporting & Visualization: Microsoft Excel, Pivot Tables, Power Query, Lookup Functions, Macros, Power BI, Dashboard Development, Data Visualization
Tools: Git, GitHub, VS Code, Jupyter Notebook

PROFESSIONAL EXPERIENCE

Python & Data Analytics Trainee – QSpiders *Jul 2026 – Present*

- Undertaking practical training in Python and Data Analytics, focusing on data manipulation, analytical problem-solving, and structured datasets.
- Applying Python libraries and EDA techniques to inspect datasets, identify patterns, and prepare data for analysis.
- Strengthening SQL, MySQL, and Excel skills through practical exercises involving data querying, analysis, and reporting.

Data Entry Operator – Sirohi Scan Center, Meerut *Jul 2025 – Oct 2025*

- Entered, reviewed, and maintained operational records with strong attention to data accuracy, completeness, and consistency.
- Verified information, identified missing or inconsistent entries, and supported correction of record-level discrepancies.
- Assisted with digital documentation and reporting workflows while maintaining confidentiality and completing tasks within operational timelines.

ANALYTICAL PROJECTS

Retail Sales, Inventory & Customer Insights Analytics *Power BI | DAX | Power Query | SQL*

- Designed a six-table star schema data model integrating Sales, Product, Customer, Store, Calendar, and Inventory data.
- Developed interactive dashboards to analyze sales trends, product performance, inventory levels, and customer purchasing behaviour.
- Implemented DAX measures for YoY, MoM, YTD analysis, Top-N rankings, Inventory Days of Cover, and ABC inventory classification.
- Monitored stockout indicators, customer segments, and store-level performance to support data-driven business recommendations.

Customer Behaviour Analysis *Python | SQL | Power BI*

- Performed data cleaning and exploratory data analysis to identify customer purchasing patterns and sales trends.
- Applied SQL queries, joins, and aggregations to extract actionable business insights.
- Built interactive Power BI dashboards to visualize customer segments, KPIs, and performance indicators.

Netflix Analysis *Python | SQL*

- Conducted exploratory data analysis and data cleaning to identify content distribution patterns and trends.
- Used SQL filtering, grouping, and aggregations to analyze genres, content distribution, and release trends.

Pizza Hut Sales Analysis *SQL | Excel*

- Analyzed transactional sales data using SQL joins, subqueries, and aggregations to identify revenue trends, product performance, and business KPIs.

EDUCATION

Vidya College of Engineering *2023 – 2027*
B.Tech, Computer Science Engineering CGPA Equivalent: 79.9%
Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Netaji Subhash Inter College *2020 – 2023*
Senior Secondary Education
Intermediate: 84.8% | High School: 82.8%
